

Poster Guidelines

Please have students put the following information on their posters.

- 1) Title of project
- 2) Name of students in the group
- 3) Problem statement – in a paragraph, the students should summarize the problem that they worked over the course of the program.
- 4) Process – in a few paragraphs, the students should explain what methods they used for working on the problem. This section does not include the solution but rather describes the strategy the students used and chronicles their progress on working towards the solution.
- 5) Solution – in this section, the students should use words, diagrams, mathematical symbols, etc. to explain their solution.
- 6) Conclusion – in a few paragraphs, the students should summarize what they learned about their project.
- 7) Extensions – the students should list a few possible extensions of the problem.
